Education

Bachelor’s Degree in Information Security,
Tashkent University of Information Technologies 
Cumulative GPA: 4.5 / 5.0
Year 2 GPA: 4.9 / 5.0
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems, Cybersecurity Fundamentals.

09/2024 – Present
Tashkent, Uzbekistan

Courses

Meta Back-End Developer , Coursera (Meta) 2025
Python, Django, databases, version control, and backend development fundamentals.

Express Algorithm , 42.uz 06/2025 – 09/2025
Solved 400+ DSA problems (LeetCode): arrays, linked lists, trees, graphs (DFS/BFS), hashing, stacks/queues, bit manipulation. Big-O.

Express Backend , 42.uz 08/2025 – 02/2026
Built and deployed backend applications using Linux, Git, Python (OOP), Flask, SQL, Nginx, and Unicorn.

Experience

Backend Developer Intern, Cyber Security Center UZ 

03/2026 – Present
Tashkent, Uzbekistan

Projects

Ozodbek's blog , Django portfolio & blog 02/2026 – 05/2026

- Built and deployed a full Django 6 blog/portfolio from scratch on a self-managed Linux VPS (Gunicorn, Nginx, WhiteNoise, Cloudflare), with a CKEditor 5 editor and automatic WebP image compression.
- Engineered in-memory caching with signal-based invalidation and mobile performance optimizations (lazy loading, off-screen render skipping, woff2 fonts), achieving near-zero origin load behind Cloudflare edge caching.
- Hardened for production with per-IP rate limiting, secure cookies/SSL, admin session timeout, and SSRF-safe server-side proxies for GitHub/LeetCode activity stats.
- Implemented SEO with a dynamic XML sitemap (per-page priority, accurate lastmod), JSON-LD structured data, and Open Graph tags; covered core logic with unit tests.

Skills

Languages
Python, Go (Basic), C++ (Basic)

Databases
PostgreSQL, SQLite
(solved LeetCode Top 50 SQL problems)

Concepts
Data Structures & Algorithms, OOP, HTTP, Cloud Deployment (DigitalOcean, Oracle Cloud, alwaysdata)

Frameworks
Django, Flask

Systems & Tools
Unix systems, Git/GitHub, Nginx, Unicorn
